

RF Front-End Level Diagram

Power levels along the selected CRPA RF chains (all values in dBm unless stated otherwise)

L1 path - J1 CW jammer (1575.42 MHz)

L2+L5 path - J2 noise jammer shown at L5 (1176.45 MHz)

ADRV9026 equivalent 0 dBFS input reference ≈ -10.7 dBm. L2+L5 cascade NF uses the conservative 1.2 dB L2 filter loss; J2 is at L5, so its level path uses the specified 1.0 dB L5 loss.

J1/J2 are in-band and require spatial suppression; J3 is out-of-band and is primarily suppressed by the preselector filters.
